Health Services
End of Semester Reminders

For any student with a uterus who is over the age of 21 and in need of a pap test (cervical cancer screening), health services offers appointments to do this for free until May 4th.

Routine STI screening is free and offered by appointment until May 4th.

If you are prescribed a medication by one of our providers and will need refills over the summer, now is a good time to make arrangements. You can either email the prescribing provider or set up an appointment.

Appointments for travel consultations are available until May 10th.

*Please email: healthservices@bowdoin.edu or call: 207.725.3770 to schedule*
