OFFICE OF RESIDENTIAL LIFE

Data from Spring 2010 Housing Lottery

The following tables show total applications received during the 2010 Housing Lottery. Rooms that are occupied by members of the Residential Life Staff or designated Dean's beds are not included in the counts. The data provides a general overview of the total number of requests that were made and the total number that were assigned in each given lottery. Following the aggregate totals for chem.-free, quads, triples, singles and doubles are breakdowns of each lottery. The applications were broken down into groups that contain applicants all from the same graduating class year or any combination of mixed graduating class years. Data is only listed if applications were submitted for that particular lottery.

Each application submitted for the housing lottery fell into one of five categories. 1. The group or block was assigned to a room or rooms in that particular lottery. 2. The group or block was not assigned and was required to participate in a subsequent lottery. 3. The group or block decided to pass. 4. The group or block already received housing in a previous lottery. 5. The members of the group or block were not present and were recorded as a "no show/pass". Note: Total Apps = Total Assigned + Total Not Assigned. Total Not Assigned = Total Passes + Total Previous Assigned + Total No Show (+ Total Not Even Reached, which are not listed).
