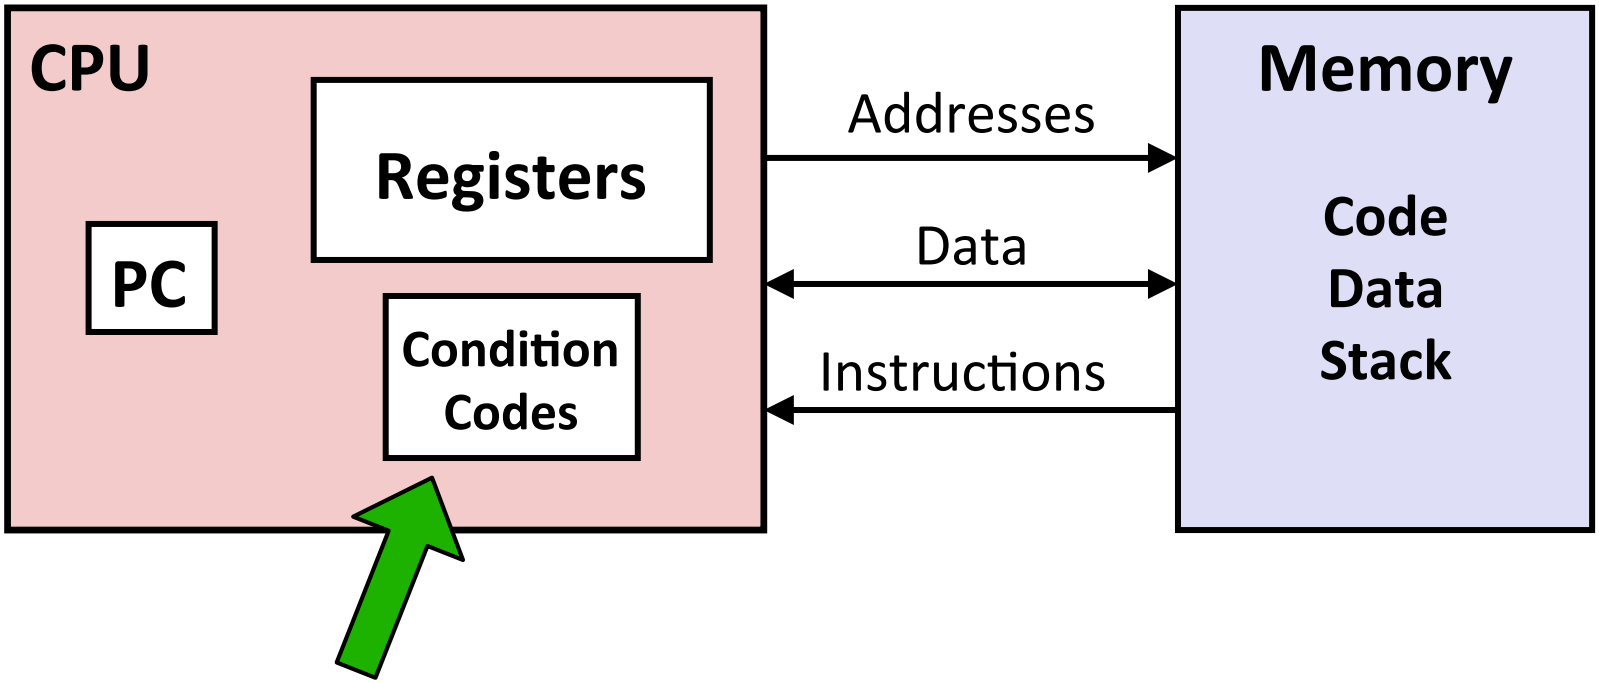
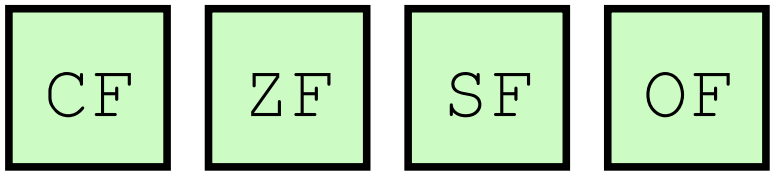
Machine Code: Control Flow



Condition Codes



Condition codes

CF: **Carry flag** (set if carry-out bit = 1)

ZF: **Zero flag** (set if result = 0)

SF: **Sign flag** (set if result top bit = 1)

OF: **Overflow flag** (set if signed overflow)

Setting CCs

(1) `cmpq a,b` (set based on `b - a`)

(2) `testq a,b` (set based on `a & b`)

(3) arithmetic insts (implicit, all except `leaq`)

```
int things_read; // numbers of "objects" read by scanf

int i;     // declared but uninitialized
char c;

// read an int from user, store it at address &i
things_read = scanf(“%d”, &i);

// read an int and a char, store at addresses &i and &c
things_read = scanf(“%d %c”, &i, &c);

// sscanf variant: read from string instead of user input
things_read = sscanf(some_str, "%d %c", &i, &c);
```
