

# Schiller Coastal Studies Center Trail Map

The **Schiller Coastal Studies Center** (SCSC) facilitates teaching and research across a range of scientific disciplines. Access to the ocean enriches our hands-on research approach, and our natural laboratory includes walking access to miles of coastal habitat (rocky intertidal, cobble beach, soft sediment, and subtidal eelgrass), as well as water access to exposed rocky environments and the Kennebec and New Meadows estuaries.

Bowdoin's connection to this facility began with a deeded gift from the family of Irma and William H. Thalheimer '27 and was enhanced over the years by gifts from L.L. Bean Chairman Leon Gorman '56, H'83 and Lisa Gorman and by Geoffrey C. Rusack '78, P'13 and Alison Wrigley Rusack P'13, along with support from the National Science Foundation. A new phase of development was launched in 2017 with a generous gift from from Phil Schiller P'17 and Kim Gassett-Schiller P'17, and the center is renamed the Schiller Coastal Studies Center in their honor.

## GUIDELINES FOR TRAIL USE

1. The trails are open dawn to dusk.
2. Please protect the natural habitat by staying on designated trails.
3. These trails are designed for foot traffic only (no bicycles or motorized vehicles).
4. Ongoing research takes place here. Please respect any flags, markings, or other scientific equipment.
5. Please do not collect anything from the center.
6. Dogs must be on a leash and stay on the main trails. Please carry out any waste left by pets.
7. Hunting is strictly forbidden on the property.
8. No camping, smoking, or fires are allowed on the property.
