*The Latin text quoted above has introduced Bowdoin's Commencement Program since August 21, 1822. The names of the 24 graduates of the Class of 1822 were, for the most part, also translated into Latin for the program. In the early years of the College, each graduating senior was required to deliver a Commencement "part," an oration on ancient or modern topics, which was frequently given in one of the classical languages, Latin, Greek, or Hebrew. The final Latin oration was given in 1893, but the tradition of Latin survives in the language used to dedicate the Commencement Exercises and to confer the bachelor of arts degree. The translation below was provided by Barbara Weiden Boyd, Winkley Professor of the Latin Language and Literature.*

May it be good, felicitous, and well-omened:

[an ancient Roman formula used at the outset of a ritual to ensure its success]

To Angus King, esteemed Governor;  
to the Representatives and Senators  
who personally preside over the arts and letters for the State of Maine;  
and to the honorable and respected Trustees of Bowdoin College;  
to Barry Mills, distinguished President;  
to the entire academic senate; to the venerable religious leaders;  
in short, to all patrons of the human race everywhere,  
the young people hereby initiated into the arts and letters  
most humbly dedicate these exercises.

Held in a gathering of Bowdoin College, in Brunswick, in the State of Maine,  
on the eighth day before the Kalends of June, in the 2002nd year of our well-being  
and in the 226th year of the authority of the United States of America.

## DEGREES

This ancient formula is used by the President in conferring degrees:

*Candidati pro gradu baccalaureali, assurgite.*

*Vir honorande, hosce juvenes, quos censeo idoneos primum ad gradum in artibus, nunc tibi offero, ut a te instructus, eos ad gradum istum admittam. Placetne? (Placet.)*

*Pro auctoritate mihi commissa, admitto vos ad primum gradum in artibus, et dono et concedo omnia jura, privilegia, honores atque dignitates, ad gradum istum pertinentia.*

*In cujus testimonium hasce membranas litteris scriptas accipite.*

Candidates for the Baccalaureate degrees will rise.

(To the Chair of the Board of Trustees) Honored sir, these young people whom I deem worthy of the first degree in Arts, I now present to you, that, if you so direct, I may admit them to that degree. Is such your will? (It is.)

(To the Candidates) By virtue of the authority vested in me, I now admit you to the first degree in Arts and do grant and confer upon you all the rights, privileges, honors, and dignities pertaining to that degree.

In witness whereof, receive these diplomas.

*NOTE: The Baccalaureate degrees are awarded individually, and the Graduating Class requests that there be no applause until the last degree is conferred.*

*At the Commencement Exercises, Bowdoin displays the College flag and the flags of the United States of America, the State of Maine, and the home countries or territories of graduating international students — in 2002, Canada, Finland, Germany, India, Japan, Jordan, Kenya, Nepal, People's Republic of China, Switzerland, Thailand, and the U.S. Virgin Islands.*

## HONORANDS OF THE 2002 COMMENCEMENT

### MARSHA JOHNSON EVANS DOCTOR OF HUMANE LETTERS

Marsha Johnson Evans is national executive director of Girl Scouts of the USA, the world's preeminent organization dedicated solely to girls. Since taking the helm of GSUSA in 1998, Ms. Evans has guided the organization in furthering its goal of helping girls grow strong in body, mind, and spirit. Under her leadership, membership has grown to 2.7 million girls, and adult volunteers have increased to an all-time high of one million.

A retired rear admiral in the United States Navy, Ms. Evans spent much of her 29-year Naval career at the forefront of increasing opportunities for women in the Navy. Before retiring, she served as superintendent of the Naval Postgraduate School in Monterey, California; headed the Navy's worldwide recruiting organization; and served as Chief of Staff at the U.S. Naval Academy in Annapolis, Maryland, and as Chief of Staff, Naval Base, San Francisco.

A native of Springfield, Illinois, she earned a bachelor's degree from Occidental College and a master's degree in law and diplomacy from the Fletcher School of Law and Diplomacy at Tufts University.

### EDWARD J. MCCLUSKEY '51 DOCTOR OF SCIENCE

Edward J. McCluskey '51 is professor of electrical engineering and computer science and director of the Center for Reliable Computing at Stanford University. He worked on electronic switching systems at Bell Labs from 1955 to 1959, then was named professor of electrical engineering and director of the University Computer Center at Princeton University. He moved to Stanford in 1966 and founded the Stanford Digital Systems Laboratory, the Stanford computer engineering program, and the Stanford Computer Forum.

Dr. McCluskey earned his A.B. from Bowdoin and B.S. and M.S. from MIT in 1953, and his Sc.D. from MIT in 1956. As a doctoral student at MIT, he developed the first algorithm for designing combination circuits, the Quine-McCluskey logic minimization procedure. At Bell Labs and Princeton, he developed the modern theory of transients (hazards) in logic networks and formulated the concept of operating modes of sequential circuits. His Stanford research focuses on logic testing, synthesis, design for testability, and fault-tolerant computing.

Dr. McCluskey served as the first president of the IEEE Computer Society, and is the recipient of the 1996 IEEE Emanuel R. Piore Award.

KENNETH PAIGEN  
DOCTOR OF SCIENCE

Kenneth Paigen is director and senior staff scientist at The Jackson Laboratory, a world leader in mammalian genetics research located in Bar Harbor, Maine. Dr. Paigen has gained international recognition for his distinguished career in genetics and his pioneering work in biochemical genetics.

A graduate of Johns Hopkins University, Dr. Paigen earned his Ph.D. in biochemistry at the California Institute of Technology. Following a 27-year tenure at the Roswell Park Memorial Institute in Buffalo, New York (where he spent 10 years as chairman of the department of molecular biology), he served as professor and chairman of the department of genetics at the University of California at Berkeley. He became Jackson Laboratory's director in 1989.

Under Dr. Paigen's direction, the staff of the nonprofit Jackson Laboratory has doubled to nearly 1,100, and its annual operating budget has quadrupled from \$24 million to nearly \$100 million. The laboratory has contributed significantly to the past decade's explosive growth in research using the genetic systems of mice to understand human biology and medicine. Today the work of the laboratory's 34 research groups covers many of our major ills, including cancers, heart disease, osteoporosis, diabetes, autoimmune disorders, and epilepsy.

## HONORS IN MAJOR SUBJECTS

The Departments of Art History, Biology, Chemistry, English, Geology, Mathematics, Music, Psychology, Romance Languages, and Sociology and Anthropology, and the Biochemistry, Latin American Studies, Neuroscience, and Women's Studies Programs award only one level of departmental honors. Other departments award honors at the level of Highest Honors, High Honors, and Honors, and the recipients are so designated.

## ACADEMIC APPAREL

The formal academic attire that distinguishes faculty and graduates at academic ceremonies is a symbol at once vertical and horizontal. It stretches back into history, to the roots of academic institutions, while at the same time it forms a bond of union among contemporary academic scholars.

The gown, cap, and hood, which would certainly seem quaint today if worn on our city streets, were originally the ordinary apparel of our medieval ancestors. The gowns varied in elegance according to the rank and wealth of the owners, and the hood had the practical function of being pulled over the head for warmth. Many of the medieval universities had strict rules on the subject; at Oxford, for example, the master of arts had to swear that he owned the dress prescribed for his degree and that he would wear it on all proper occasions. Undergraduates were required to wear their gowns whenever they appeared in the public street. After the sixteenth century in Europe different styles prevailed, but the older style was retained for certain legal, official, clerical, and, especially, academic uses.

In America the gown has been used to some extent since colonial times. It was only in the late nineteenth century, however, that widespread interest — sparked perhaps by the observance in 1886 of the 250th anniversary of the founding of Harvard — brought about several developments. In 1887 an enterprising member of the graduating class of Williams College designed academic gowns for the graduates to wear at the Commencement ceremony. The garb was significant and dignified; it was both traditional and democratic; it answered a need, and it quickly became popular. In 1895 an intercollegiate code, standardizing the design and the color of each part of the academic regalia, was accepted by nearly all American colleges and universities.

The gown is usually black, and the cut of the sleeves differs for bachelors, masters, and doctors. In addition, the doctor's gown has panels of velvet (usually black) down the front and on the sleeves.

The cap is generally black, with a tassel which is either black or the color of the field of study; a doctor's may be gold. The most common style of cap is the Oxford "mortar board," with a square flat top, but some variations are permitted.

The hood is the most distinctive part of the costume. It is made of black and trimmed with velvet. Both the length of the hood and the width of the trim vary with the level of the degree, the doctor's being the longest and having the widest velvet border. The color of the velvet indicates the field of study in which the degree is received: for example, white for arts and letters (bachelor of arts), dark blue for philosophy, brown for fine arts, golden yellow for science, scarlet for theology. The lining of the hood is the color and style of the university that confers the degree; these are all specified in the standard code of the American Council on Education. Bowdoin College's lining is white and green to symbolize the Bowdoin pines.

Whatever the degree or university, those who don the gown and hood symbolically take their places in the long procession of scholars who have pursued truth and learning and passed it on to others. The consciousness of that fellowship is at once a reward for past efforts and an inspiration for the future.

## **RAISE SONGS TO BOWDOIN**

*Words by K.C.M. Sills, Class of 1901*

*New Lyrics by Anthony Antolini '63*

*Music by C.T. Burnett*

*Arr. by Thornton W. Allen*

Raise songs to Bowdoin, praise her fame,  
And sound abroad her glorious name;  
To Bowdoin, Bowdoin lift your song,  
And may the music echo long  
O'er whispering pines and campus fair  
With sturdy might filling the air.  
Bowdoin, from birth, our nurturer and friend  
To thee we pledge our love again, again.

While now amid thy halls we stay  
And breathe thy spirit day by day,  
Oh may we thus full worthy be  
To march in that proud company  
Of poets, leaders and each one  
Who brings thee fame by deeds well done.  
Bowdoin, from birth, our nurturer and friend  
To thee we pledge our love again, again.
