Executive Summary

Our Priorities

- First and foremost, the health and safety of students, faculty, staff, and our neighbors in the broader Brunswick community; and
- providing an excellent Bowdoin education to every student.

Our Plan Summary

We will have some students back in the fall, but not all students. The group on campus will be:

- our new first-year and transfer students;
- students who have home situations that make online learning nearly impossible;
- a very small number of senior honors students who cannot pursue their pre-approved projects online and require access to physical spaces on campus, and can do so under health and safety protocols; and
- our student residential life staff.

All students in residence will be required to sign a residential community agreement that outlines the requirements for living on campus. Failure to comply with the residential community agreement or other policies related to student conduct will result in disciplinary action, including but not limited to removal from campus, suspension, or a hearing before the Judicial Board.

All other sophomores, juniors, and seniors will remain off campus for the fall semester and will take their courses online. With priority given to seniors, if the fall semester goes as we hope, we expect to have our seniors, juniors, and sophomores return to campus for the spring semester, with the added possibility that our winter and spring athletes may be able to engage with their sports in some way. We expect that our first-year and transfer students will study remotely in the spring.

In order to provide the best learning experience possible, nearly all classes, including those on campus, will be taught online. This learning model will bear little resemblance to the emergency version that was created in the spring. Allowing faculty to focus on a single model of teaching, and directing our resources to that single model—rather than a hybrid model—will create the conditions for crafting powerful online course offerings. We are also mindful that teaching in person with masks and appropriate physical distancing will have its limitations.
The exception to the online learning model is that many first-year writing seminars will be taught in person or have in-person components. We also anticipate that faculty will develop opportunities for in-person intellectual engagement outside of class time for first-year students, transfers, and other students here on campus. Those first-year students who are at home for the fall semester will have first-year writing seminars that are delivered online.

Athletics is an important part of the Bowdoin experience for so many of our students. Unfortunately, given that we will not have all students on campus in the fall, we will not be participating in fall and winter varsity sports during the fall semester. The New England Small College Athletic Conference (NESCAC) is developing plans for fall, winter, and spring sports regarding the ways in which coaches will be permitted to engage with their teams, and we anticipate providing opportunities for our coaches to work with their student-athletes from each sport season in the fall. The conference’s most recent statement can be found later in this message. As we have already noted, we are hopeful that there will be an opportunity for the winter, spring, and possibly fall varsity athletes to participate and compete in some form after January 1.

Those on campus will be required to follow critical safety practices—face coverings, physical distancing, good and regular hygiene, and self-monitoring for symptoms. In addition, students on campus will be tested for the virus at least two times a week and will be required to participate in a contact-tracing program.

All students on campus will have a single bedroom, and there will be dining service.

We will have a normal fifteen-week semester, with classes beginning on September 2, and exams ending on December 21. All students will leave campus ahead of Thanksgiving and finish the term online. There will be a fall break from courses, though students on campus will be asked to remain on campus.

Campus Status Levels

Bowdoin College has developed a system of status levels that will give guidance to movement and activity on campus. The status levels will be determined by the confirmed rolling seven-day positive cases, percent of those positive cases linked to other known cases as an indicator of uncontrolled spread, usage of our dedicated isolation beds, the percentage of missed COVID-19 tests by students and employees, and evidence that the Bowdoin community is disregarding masking, distancing, and other behavioral protocols, as well as other factors in the local midcoast community, including intensive care unit and in-patient bed availability for COVID-19 patients at local hospitals.

The College will be operating at one of three campus status levels throughout the fall: yellow, orange, or red. A status of yellow will serve as the baseline, with rules, measures, and access becoming more restrictive from yellow to orange, and more so from orange to red. Changes to status level will be announced to the Bowdoin community. Our goal in creating these levels is to provide visibility into how our behaviors and actions will be impacted by different scenarios. The guidelines associated with each level will be revisited periodically for updating. And at any given time, federal, state, and local mandates may supersede the guidance from Bowdoin’s levels. The complete status levels are included at the end of this document.

The complete status levels are included at the end of this document.
Campus Safety Measures and Protocols

Testing
The science is clear that a combination of face coverings, social distancing, proper hygiene, and symptom monitoring is very effective in preventing transmission of COVID-19 and that regular and frequent testing and contact tracing are the most effective ways of interrupting the spread of the virus and preventing outbreaks.

Pre-Arrival Testing
The College has invested significant time and resources to offer a robust testing program this fall for the campus community. Given recent nationwide developments in the COVID-19 pandemic, Bowdoin has decided to send self-administered COVID-19 tests to students currently in the continental United States who will be on campus this fall. We have implemented this new requirement in order to:

• determine your COVID-19 status before you arrive so that, if you test positive, you can recover and quarantine safely and comfortably at home, rather than having to move to our isolation building during your first days on campus; and

• reduce the risk to the local Brunswick community as students travel and arrive on campus.

The sample collection is self-administered using a shallow nasal swab, much like a Q-tip. For more information, you can watch this video describing LGC’s at-home sample collection process.

Students will receive the kit in the mail the week of August 17. They should hold onto the kit and keep it in a safe place. Bowdoin asks that you take the test on the morning of Friday, August 21. The kit comes with a prepaid envelope that you will need to drop off at a UPS store or other UPS pick-up location by noon on Friday, August 21.

Semester Testing
Bowdoin College has developed a testing protocol in partnership with the Broad Institute in Cambridge, Massachusetts, that is central to our return-to-campus plan. For the first fourteen days on campus, all students residing on campus will be tested three days a week. Following this fourteen-day period, all students residing on campus will be tested twice a week, either on a Monday/Thursday schedule or a Tuesday/Friday schedule, to maximize a fast response to any potential campus outbreak.
Bowdoin’s testing site will be in Morrell Gymnasium, and students, faculty, and staff will schedule their test times in advance. Testing will be via a self-administered, observed nasal swab. Results should be provided within twenty-four hours. (See page 22 for more information about isolation after a positive test.) Faculty and staff who are likely to interact with students often will also be tested twice a week. Faculty and staff who will be on campus daily or occasionally but are not as likely to interact with students will be tested once a week. In the unlikely scenario that you need to change the time of your scheduled test, please email covidtsa@bowdoin.edu.

To help protect both them and our local community, students living off campus in Brunswick this fall will be offered a convenient COVID-19 test once a week. Kits will be collected and dropped off at Mid Coast
Hospital’s Parkview facility, located just five minutes from campus. Students will receive results within twenty-four hours via an email from NorDx Laboratories with instructions for next steps. While the College will not receive these results, off-campus students are expected to avail themselves of this free resource and take seriously the CDC-recommended isolation period of ten days after the date of a positive test or, for those who develop COVID-19 symptoms, after at least ten days have passed since the onset of symptoms and at least twenty-four hours since the resolution of a fever without the use of fever-reducing medications.

Contact Tracing
Contact tracing is the process used to identify those who come into contact with a member of the on-campus Bowdoin community who has tested positive for COVID-19. Working in conjunction with Maine CDC, the College has trained professional staff to perform contact-tracing procedures. Procedures include remote interviewing of an infected member of the community and contacting Bowdoin community members who were in close contact with the infected individual for more than fifteen minutes within seventy-two hours of the positive test. Throughout the process, the identity of the infected individual will remain anonymous. Students identified as a contact will have to go into quarantine. (See page 22 for details on what it means to be in quarantine.) Faculty and staff identified as contacts will be asked to stay home until medically cleared by their primary care physician.

Symptom Tracking
Bowdoin community members will utilize a symptom tracker for self-reported symptom screening. Students residing on campus will complete a daily survey prior to leaving their residence halls and will receive direction from Health Services if symptoms are reported. Faculty and staff will complete a symptom survey prior to arriving to campus for work and will be directed to their primary care physician if they are symptomatic.

Face Covering
Students, faculty, and staff will all receive two cloth face coverings. Faculty and staff are required to wear face coverings at all times indoors on campus except when alone in a private office or research lab. Face coverings are required to be worn by students at all times in common spaces indoors, with the exception of certain times in a student’s residence hall. Please see the section on Residential Life that begins on page 16 for more information. Face coverings are also required outdoors when you are not able to keep at least a six-foot separation from others. If the campus status level is red, adequate face coverings
are required at all times, inside and outside. Bandanas, neck fleeces or gaiters, and turtleneck sweaters are not protective face coverings and so are not adequate. Students who have a medical condition that precludes the use of a mask must register with Lesley Levy, director of student accessibility. Faculty and staff who have a medical condition that precludes the use of a mask should contact the Office of Human Resources. Certain staff whose work tasks have been evaluated and require a more protective level of PPE may be issued a KN95 mask. Faculty who are teaching in-person first-year writing seminars may also request a KN95 mask or face shield via the office of environmental health and safety.

Social Distancing

Students, faculty, and staff will be asked to maintain at least a six-foot separation from others at all times. Where applicable, floor markings for queuing will be used to show a six-foot separation.
Preparing Our Buildings

Indoor Air Quality
The College contracted with an engineering consultant to evaluate the heating, ventilation, and air conditioning systems in buildings across campus and to recommend modifications to improve these systems. Implementation of these recommendations began in July and include the installation of high-efficiency air filters where possible and the rebalancing of air handling units to improve ventilation rates as necessary. The study included the assessment of air flow in individual classrooms, lecture halls, and meeting rooms to either confirm or reduce maximum occupancy limits for each space. Several buildings and spaces on campus (e.g., Banister Hall, Massachusetts Hall, Hubbard Hall) have heat but do not have any mechanical ventilation to speak of. Student access to these buildings will be restricted.

Campus restrooms have been a focus for facilities staff this summer. Hand dryers have been disabled in all restrooms, and exhaust fans have been checked to confirm proper operation. Plumbing systems have been flushed and routinely maintained this summer to prevent risk of Legionnaires’ disease and other bacterial issues from developing.

Cleaning Protocols
In alignment with CDC recommendations, the College will implement enhanced cleaning and disinfecting procedures. High-traffic areas, classrooms, and restrooms will be targeted for greater frequency cleaning using EPA-registered products for use against the novel coronavirus. Over 250 sanitizing stations will be located across campus.

All classrooms, break-out rooms, and tent facilities designated for first-year writing seminars (FYWS) and student activities use will be cleaned and disinfected by housekeeping before and after each use. The COVID-19 testing center in Morrell Gymnasium will be cleaned periodically throughout the day and then treated with high-powered ultraviolet light at night.

Waste Management in Residence Halls
All student dorm rooms are equipped with trash and recycling bins. Students will be required to empty both the trash and recycling containers from their dorm room into the trash and recycling dumpsters closest to their residence hall (a map with locations of dumpsters will be provided in the residence halls). Due to the potential for increased take-out food options, students interested in composting will be provided with compostable bags that can be dropped into
the compost collection bins near the trash and recycling dumpsters. Residence hall restroom trash will be handled by housekeeping staff.

Wayfinding

Campus buildings and residence halls have been extensively analyzed to determine the optimal flow and circulation of foot traffic. When you are preparing to enter a building, please be aware of which doors should be used for entrance and which doors are exit only. Follow any directive pathways in buildings, especially paying attention to stairwells marked as “up” or “down,” and obey capacity limits in elevators as well as in individual rooms.
On-Campus Student Living and Learning

Residential Community Agreement and Expectations of Students in Residence

Commitment to the common good is a hallmark of Bowdoin’s community standards. In an effort to keep Bowdoin’s residential community as safe and healthy as possible, and to promote the ability to continue some in-person operations during the 2020–2021 academic year, this residential community agreement aims to lay out the essential need to focus on the common good and the standards by which we will keep our community safe. Our community must make a collective effort to minimize person-to-person transmission of COVID-19 and to protect all of those who are in our educational community.

Students in residence must comply with all health and safety guidelines and requirements outlined by the Campus Status Levels (CSL) of yellow, orange, and red. Students are responsible for knowing the current status levels and for following all corresponding health and safety protocols. Students must comply with the residential community agreement as well as any other policies governing student conduct.

Prior to Arrival

All students should plan to self-quarantine for fourteen days before arrival and to take extreme care while traveling to campus. As previously stated, students will be mailed a pre-arrival COVID-19 test kit to be completed and mailed by noon, August 24; any students who test positive will be asked to defer their travel to campus until they are cleared by a healthcare professional. Additionally, any students showing symptoms associated with COVID-19 are asked to postpone their arrival on campus until cleared by a healthcare professional.

Student Move-In

First-year students will move into their residences on Saturday, August 29. Students will be given a specific window of time to arrive on campus and will immediately check in at Morrell Gymnasium for testing before being allowed into their residence hall. One parent or guardian will be allowed on campus with each student on move-in day, though only students may enter residence halls or other campus buildings. Restroom access will be provided for family members, and a bag lunch for students and one family member each will be available for pick-up at Coe Quad. Upperclass students will be permitted to move into their residences either on August 29 or August 31 and will also immediately report to
Morrell Gymnasium for testing upon arrival. All arriving students are asked to self-quarantine in their rooms until they are cleared by two negative test results, with the exception of limited movement for meal pick-up, personal exercise, and any orientation programming. During the first two weeks on campus, all students will be tested three times a week. First-year students who have questions should contact Melissa Quinby, dean of first-year students, and upperclass students who have questions should contact Lisa Rendall, director of housing and residential operations.

Packing Checklist and Evacuation Plan
Students will be provided with a move-in checklist for packing. Students should plan on packing lightly so that they may easily vacate campus if that becomes necessary. Prior to the start of the semester, students in residence must develop an evacuation plan in the event that Bowdoin is required to close campus due to a public health emergency. This plan should include how the student will leave campus, where they will stay, and how they will remove or store their belongings. The College will be unable to store student belongings or to assist financially with departure from campus. Students will have seventy-two (72) hours from the time that any announcement is made in which to depart campus.

Orientation
The first-year deans and orientation interns in the Office of the Dean of Students have developed a comprehensive orientation for first-year students. Orientation will consist of both remote sessions, some of which will be viewed prior to arrival, and in-person events designed with health and safety in mind.

Off-Campus Travel
When the campus status is yellow, students may conduct essential personal business off campus, but students are expected to observe health and safety protocols, such as properly wearing face coverings or masks and washing hands. “Essential personal business” includes obtaining food, off-campus appointments, banking, etc. Students are not allowed to visit a private residence off campus, including those lived in by Bowdoin students.

While in residence, students may not leave Maine, except with written permission from the dean of students or their designee. The College requires written permission in order to: 1) keep campus as safe as possible from the spread of illness; and 2) work with a student to create a customized quarantine plan for their return to campus through Health Services.
Vehicle Policy for First-year Students

Specifically to facilitate timely departures should a campus closure become necessary, the College has chosen to forego its normal first-year student vehicle prohibition and permit first-year students to have cars on campus during the fall 2020 semester.

All student vehicles must be registered with the College and display a current student parking decal. Online student vehicle registration opens on Monday, August 3. The cost for a fall semester parking decal is $50, which is billed to your student account. Your parking decal will be sent to your Smith Union mailbox. Place the decal on the right side of the rear bumper.

To help prevent the spread of the virus and keep our campus and local community safe, we have placed special restrictions on first-year student vehicle use.

- **Registered first-year student vehicles must park in the Farley Field House parking lot only.** This parking lot is located on Watson Drive (off Harpswell Road). Please park on the north end of the lot closest to the tennis courts.

- **Nonessential travel is prohibited.** First-year students are not permitted to use their cars on campus other than to unload on arrival day (Saturday, August 29) and to drive to the Farley Field House student parking lot. For example, discretionary vehicle use (i.e., driving to class or to a dining hall) is not permitted.

- To maintain social distancing, a student driver may not carry non-family passengers unless the vehicle is being used to depart campus at the end of the fall semester or in the event of a campus closure.

- First-year students may not park on Brunswick town streets.

- First-year students are not permitted to have motorcycles, mopeds, or motor scooters on campus. In addition, hoverboards or similar electronic devices are not permitted.

Campus parking regulations are strictly enforced. Fines for violations range from $25 to $200. Habitual violators will face disciplinary action, including revocation of campus parking privileges.

Residential Life

Housing will be available for the fall 2020 semester beginning on Saturday, August 29, 2020, until Saturday, November 21, 2020, at 5:00 P.M. All students will be assigned a single bedroom, though they may share a suite or apartment with other students. First-year students will be
assigned to live in a residence hall or College House. First-year housing will be broken up into core groups, which will consist of a number of first-year students and two proctors, who are upperclass students trained in supporting first-year students and creating community among the core groups with programming, “flinners” (floor dinners), and other activities. Upperclass students will be assigned to live in an apartment and will have access to an RA for support and programming. Students may not have guests in their bedrooms at any time this semester; however, when the campus status is yellow they are allowed to visit other residence halls. During the Fall 2020 semester, students are not permitted to host or allow guests anywhere on campus for any period of time. “Guests” include, but are not limited to, family members, prospective students, enrolled Bowdoin students without permission to be on campus, and Bowdoin students who are on a personal leave of absence from the College.

**Bathrooms:** Face coverings should be worn in bathrooms except when using the sink or shower. Students should use the same bathroom fixtures (e.g., stall, sink, shower, etc.) as consistently as possible. The highest level of hygiene and cleaning practices should be maintained in order to protect all residents. Students will be unable to keep personal items such as shampoos and other toiletries in the bathroom.

**Common Spaces:** Each residence hall common space will have a maximum occupancy in order to ensure physical distancing. Core groups may use common spaces if health and safety standards can be maintained. When the campus status level is yellow, face coverings are optional in common areas of residence halls, including hallways, after 3:30 p.m. Monday through Friday and all day on the weekends when only members of the core group are present. For students who reside in on-campus apartments, face coverings are also optional in common areas of the apartments at all times when the campus status level is yellow and only residents of the apartment are present.

**Gatherings**

During the semester, the Office of Residential Life will not register parties or events. However, students will be able to gather within certain guidelines.

A “gathering” is defined here as the convening of two or more students, whether planned, casual, or spontaneous, in any space on campus, whether indoors or outside. It includes parties, events, casual socializing, or activities.

Gatherings are permitted under the following conditions:

**1. Gatherings of students from one core group:** These gatherings are limited to not more than twenty (20) students who are assigned to live in a single “core group.” For first-year students and transfer students, this
core group consists of all students affiliated with a proctor group. For upperclass students, the core group is the student’s suitemates.

No one other than enrolled Bowdoin students assigned to live in that core group may attend the gathering. These gatherings can occur within that core group’s common spaces. Examples of common spaces include semiprivate areas like a suite’s common room or public spaces such as floor common rooms. Gatherings cannot be held within individual bedrooms. Face coverings or masks must be properly worn at all times.

2. Gatherings of students from at least two core groups: These gatherings can be attended by students assigned to different core groups in a common space where all students can practice physical distancing and remain six feet apart. The total number of students cannot exceed ten (10). This includes inside residence halls and any other indoor gathering places on campus.

Examples of common spaces include semiprivate areas like a suite’s common room, floor common rooms, or other areas students have been given permission to congregate, such as 30 College Street or SWAG. Gatherings cannot be held within individual bedrooms. Face coverings or masks must be properly worn at all times. If a gathering is held outside, up to twenty (20) students may attend within physical distance guidelines.

3. College-sponsored: Indoor gatherings sponsored by the College—including those hosted by a recognized chartered Bowdoin student group with permission to host a gathering—are limited to the lower of fifteen (15) students in residence. Outside gatherings are limited to a maximum of twenty (20) people. Large outdoor gatherings may only take place in those spaces that have been designated to safely accommodate the size of the gathering.

No alcohol is permitted in any first-year residence, and hard alcohol is not permitted anywhere on campus. See Bowdoin’s Alcohol and Substance Use policy for more detail.

Students participating in any gathering must observe health and safety guidelines, including physical distancing practices, and properly wear a face covering or mask indoors as required by the CSL or the Maine Center for Disease Control.

Remember: the threat of a community outbreak increases as a result of irresponsible actions. If students are unable to abide by these guidelines, the College may need to limit the number of students permitted to gather, reduce spaces where students are allowed to gather, or cancel college-sponsored events.
Student Life

The Division of Student Affairs has been working all summer to create exciting and engaging experiences for students beyond their academic coursework. These will include activities and events and help students build virtual communities through residential life, student activities, the Office of Career Exploration and Development (CXD), athletics, and the Office of Inclusion and Diversity. In addition, residential life staff will continue to build strong virtual communities throughout the fall. When the campus status is yellow, in-person programming and activities will be available, planned by professional staff and/or students. This in-person programming will take place outside in tents or inside in designated spaces. There will also be many opportunities for virtual programming, including lectures and other interactive programming.

Standard Health and Counseling Services

All offices that support student health and wellness will be providing services to students on and off campus. Students with specific questions should reach out directly to the appropriate office to discuss their needs and to develop a plan for how they can best access the appropriate services. Students who are new to Bowdoin will be introduced to these services in their first semester on campus.

Intercollegiate Athletics

Bowdoin will not be participating in fall and winter varsity sports during the fall semester, and the New England Small College Athletic Conference (NESCAC) has canceled conference competition during the fall sports season. A decision regarding conference competition for winter and spring seasons will be made at a later date. The College anticipates providing opportunities for Bowdoin coaches to work with their student-athletes from each sport season during the fall semester, as NESCAC guidelines have been adjusted to provide greater flexibility with playing and practice seasons. Unfortunately, students not returning to campus for the fall semester will not be permitted to participate in individual or small group in-person workouts with our coaches. While there are many details to be finalized, the College is working on ways to provide a competitive athletic experience for fall, winter, and spring teams during the spring semester in accordance with federal, state, local, and institutional safety guidelines.

Club Sports and Intramurals

Club sports will follow similar guidelines as intercollegiate athletics. The Department of Athletics is working on a safe and robust intramural
sports program. Their approach is governed by the following:

- Support activity that allows for distancing and limited use of shared equipment
- Support activity that does not require significant exertion
- Support activity that requires limited ongoing oversight (self-completion and reporting)
- When self-completion and reporting is not feasible, host single-day events centered around a singular activity (supervised)
- Prioritize activity that can be completed outside, especially in the early part of the semester
Public Spaces, Events, and Visitors to Campus

Bowdoin College continues to be closed to the public in order to protect the health of students, faculty, and staff and the broader Brunswick community. Until further notice, only students, faculty, and staff participating in the College’s surveillance testing program through the Broad Institute are permitted inside any campus facilities or on campus grounds. Exceptions to this rule are the trails and athletic fields at Pickard and Whittier Fields and the playground area on Longfellow Avenue. Visitors will have access to these outside spaces provided that gatherings are kept at or below the active campus status level requirement, individuals are masked when six feet of distance cannot be maintained, and pets are leashed. Signage will be posted along the perimeter of campus to alert visitors of these restrictions.

With the exception of the trails marked by the Harpswell Heritage Land Trust, the facilities and grounds at the Schiller Coastal Studies Center in Harpswell are closed to the public. Students, faculty, and staff participating in the College’s surveillance testing program through the Broad Institute may access the grounds, but only pre-authorized students, faculty, and staff may access any buildings or the docks.
Student Self-Quarantine and Isolation

Isolation

If a student tests positive for COVID-19, the following steps will be taken to move the student to the Stowe Inn—our isolation building—where they will occupy a single room with a private bathroom until they are released from isolation. Once a student receives a positive test from the Broad Institute, they will be asked to immediately isolate in their bedroom until they are able to move to Stowe Inn. In this time, students will be asked to pack necessary belongings to be moved. The student will be assisted to Stowe Inn by a security officer. While in isolation, students are not allowed to leave their room in Stowe Inn. All meals will be delivered to them, and Bowdoin Health Services will monitor their symptoms and progress via telehealth. Students will be allowed to return to their original residence hall only when they have been cleared by Health Services. In addition to monitoring and supporting students’ physical well-being during isolation, Bowdoin will deploy a care team of professionals from the Office of the Dean of Student Affairs, Residential Life, Counseling Services, and others as necessary to ensure that isolated students receive the help and advocacy they need.

Quarantine

Any student identified through contact tracing as a close contact with someone testing positive for COVID-19 is required to be in quarantine for fourteen days as mandated by the Maine CDC. A close contact is defined as someone who was within six feet for a duration of longer than fifteen minutes with an individual who tested positive. Students in quarantine will be moved to a residence hall set up for this purpose. Food will be delivered by Dining Services, and a care coordinator will be assigned to each student in quarantine. Health Services will work with students in quarantine to perform follow-up COVID-19 tests as necessary.
Dining, Academic, and Social Spaces

Dining

There will be three meals available daily with a variety of menu options. Both Thorne Hall and Moulton Union will be open for students, and they will offer the same menu selections. Dining employees have an essential role in protecting the health and safety of students who are on campus and will follow Maine CDC guidelines in doing so. Dining staff have implemented processes and procedures to promote a safe environment during this health emergency. Dining halls will not be open to faculty and staff for the semester.

During the initial testing period, all meals will be available for takeout only. Under the governor’s executive orders signed on August 1, 2020, indoor dining in the State of Maine is limited to fifty people per room. Unless the order is changed, students can expect to eat most meals outside or in their residence hall. Eating is allowed in residence hall common areas when masks are not required (see page 17 for more details). Please remember that all trash must be taken outside to a dumpster.

Students who have a medical condition or concern that requires additional accommodations should contact Registered Dietitian Susanne D’Angelo-Cooley, MS, RDN, LD, CDE at sdangelo@bowdoin.edu or call (207) 725-3542 to make an appointment.

SuperSnack will not take place in the fall semester, but light snacks will be available each night at dinner for takeout. Magee’s Grill and Pub, The Café, and the Bowdoin Express Convenience Store will all be closed initially and reevaluated for potential opening later in the semester, subject to staffing availability and campus status level.

Academic and Study Spaces

Students on campus will have limited use of facilities, including the library and other on-campus buildings. These might include buildings with classrooms, faculty offices, and other study spaces for appropriate student use.
Academic Continuity and Resources

In order to provide the best learning experience possible, nearly all classes, including those on campus, will be taught online. This learning model will bear little resemblance to the emergency version that was created in the spring. Allowing faculty to focus on a single model of teaching, and directing our resources to that single model—rather than a hybrid model—will create the conditions for crafting powerful online course offerings. The College will return to its standard grading for the 2020–2021 academic year. However, recognizing that students may encounter challenges this fall, several temporary grade-related policy changes for the fall semester will be implemented.

First-Year Writing Seminar Program
The one exception to the online learning model for the fall is that many, if not most, first-year writing seminars will be taught in person or have in-person components. We also anticipate that faculty will develop opportunities for in-person intellectual engagement for the first-year students. Students in first-year writing seminars will need to wear face coverings at all times indoors and follow campus status guidelines while outdoors.

Remote Learning
The Continuity in Teaching and Learning Group (CTLG) spent the spring and early summer researching best practices for online learning and teaching and making recommendations for how best to prepare for online learning this fall. A campus team, with participation from the Baldwin Center for Teaching and Learning, the library, academic technology and consulting, and information technology, is conducting training sessions this summer for faculty informed by the CTLG report and recommendations. And this work will be enhanced by a partnership with a firm that has expertise in online teaching and learning, and that “gets” the specific nature of our liberal arts model. While it will be very different from the on-campus teaching and learning experience we’re accustomed to, our faculty will embrace the opportunity to translate their courses into an online environment and will deliver an excellent education to all of our students this fall.

Library, Technology, and Other Resources
When the campus status is orange or red, librarians will be available for virtual information as well as pick-up and drop-off of materials. While
the campus status is yellow, the libraries will be available for use, though resources may be limited. To provide broad accessibility and equity in the learning process and universal design advocated by the Continuity in Teaching and Learning Group (CTLG), the College will issue an Apple iPad Pro with available Wi-Fi and cellular data connectivity, an Apple Pencil 2, and the Apple Magic Keyboard for iPad, which includes a trackpad. With this common mobile computing platform, students will have the opportunity to connect to their classes, build community with each other, run the same apps and software at the same performance level, and also receive the same support, regardless of their location or learning situation. More details about Bowdoin’s iPad program are available here.

**How to Request Academic Accommodations**

Please reach out to the Office of the Dean of Students (207)-725-3149 or the Office of Student Accessibility (207)-798-4187 with questions about temporary or long-term academic accommodations.
Student Finances

**Tuition**
All of us at the College are very mindful that a Bowdoin education is expensive and that, for all of our families, it is a significant sacrifice. Central to the decision to keep the comprehensive fee and tuition at 2019–2020 levels is that the essence of what we do is to provide our students with an outstanding liberal arts education delivered by outstanding faculty who develop personal connections with our students. While the experience will certainly be different, the essence of what we do will not change. In addition, we have 100 percent of employees working, and they are each dedicated to ensuring that we deliver an excellent “Bowdoin” education to our students. Beyond this central reason, our costs will be going up this year, as we invest in this education and create the conditions necessary for health and safety on our campus.

**Refund Policy for Students Switching to Remote**
Students who are approved to leave during the semester to pursue full remote learning will receive prorated refunds of room, board, and student activities fees based on the number of days they will not be on campus for the balance of the semester. Those who are on financial aid will have their awards adjusted to reflect the changes in fees charged, if applicable.

**Tuition and Fee Refunds for Term-Time Leaves of Absence**
Tuition and fee refunds for leaves taken during the course of a semester are made in accordance with the College’s refunds policy. For more information, consult the refunds section of the Bowdoin College Academic Handbook.

**Student Employment for Fall 2020**
Unfortunately, on-campus and remote job opportunities for students will be extraordinarily limited this fall. In light of this, the fall semester work expectation has been replaced with a Bowdoin grant for all aided students.
# Campus Status Levels

## CAMPUS STATUS: **YELLOW**
- Student OneCard access: All (subject to targeted restrictions)
- Students leaving campus for personal reasons in Maine: Essential needs only; no private residences
- Students leaving campus for personal reasons outside of Maine: Permission of dean of students needed
- Gathering limit inside or outside: Lower of state mandate, posted room capacity, or 20
- Outdoors on campus: Masks required within 6 feet
- First-year writing seminars: Instruction is either outside in tents, remote, or in designated classrooms
- Research labs: Student OneCard access pre-approved by faculty member overseeing research
- Cocurricular and extracurricular programming: Small groups in pre-designated rooms or in tents, up to 20 in large tent
- Dining (Thorne and Moulton): Students only; preselected cohorts at preselected times or scheduled in dining rooms
- Residence halls: Mask required except in individual bedroom; masks are optional on weekends and from M-F after 3:30 p.m. when only core group members are present
- Residence hall laundry: Masks required
- Academic buildings: OneCard access; masks required; targeted restrictions of buildings with no mechanical ventilation
- Academic building classrooms: OneCard access to pre-designated classrooms; masks required
- Departmental offices and workspaces: Less than 50 percent of normal office staffing at the same time
- Schiller Coastal Studies Center labs: Student OneCard access pre-approved by biology department

## CAMPUS STATUS: **ORANGE**
- Student OneCard access: Student’s residence hall, dining halls, Smith Union
- Students leaving campus for personal reasons in Maine: Prohibited
- Students leaving campus for personal reasons outside of Maine: Permission of dean of students needed
- Gathering limit inside or outside: Lower of state mandate, posted room capacity, or 15
- Outdoors on campus: Masks required within 6 feet
- First-year writing seminars: Instruction is either outside in tents or remote
- Research labs: Student OneCard access pre-approved by faculty member overseeing research
- Cocurricular and extracurricular programming: Outside in tents, up to 20 in large tent
- Dining (Thorne and Moulton): Students only; to-go meals only; dining rooms are closed
- Resident halls: Common areas closed; masks required; students prohibited from visiting other residence halls
- Residence hall laundry: Check laundryview.com to schedule use that will avoid encountering others; masks required
- Academic buildings: One Card Access; targeted restrictions of buildings with no mechanical ventilation
- Academic building classrooms: OneCard access to pre-designated classrooms; masks required
- Departmental offices and workspaces: Only essential employees on campus
- Schiller Coastal Studies Center labs: Student OneCard access pre-approved by biology department

## CAMPUS STATUS: **RED**
- Student OneCard access: Student’s residence hall, dining hall for pick-up only
- Students leaving campus for personal reasons in Maine: Prohibited
- Students leaving campus for personal reasons outside of Maine: Prohibited
- Gathering limit inside or outside: Lower of state mandate, room capacity, or 5
- Outdoors on campus: Masks required at all times
- First-year writing seminars: Instruction is fully remote
- Research labs: Closed
- Cocurricular and extracurricular programming: Fully remote
- Dining (Thorne and Moulton): Students only; to-go meals only; dining rooms are closed
- Residence halls: Common areas closed; masks required; students prohibited from visiting other residence halls
- Residence hall laundry: Check laundryview.com to schedule use that will avoid encountering others; masks required
- Academic buildings: Closed
- Academic building classrooms: Closed
- Departmental offices and workspaces: Only essential employees on campus
- Schiller Coastal Studies Center labs: Closed
