In an effort to keep Bowdoin’s community as safe and healthy as possible, our community must make a collective effort to minimize person-to-person transmission of COVID-19 and to protect all members of our campus and our Brunswick neighbors. This means adhering to national, state, and local health guidelines and requirements, and adhering to those measures Bowdoin College deems necessary for its campus.

This Agreement outlines the responsibilities of contractors and vendors who will be working on campus during the spring of 2022.

Effective January 21, 2022:

**Contractors who are FULLY VACCINATED:**

- Contractors who are fully vaccinated—including a booster shot once eligible—may work on campus once they have provided proof of their vaccination status using **Health Pass by CLEAR**. The contractor can download **Health Pass by CLEAR** and enroll prior to reporting to the OneCard Office (located on the ground floor of Coles Tower) to obtain a yellow wristband to wear during their visit. The yellow wristband indicates that the contractor is authorized to work on campus and may work on campus any day of the week.

**Unvaccinated contractors or those who are NOT FULLY VACCINATED:**

- Contractors who are not fully vaccinated may be authorized to begin work on campus on Mondays and Thursdays of each week after receiving a COVID-19 antigen test between 7:00 a.m. and 8:00 a.m. at Farley Field House.
- The campus contact must send the contractor the **Bowdoin Outside Contractor Testing Consent and Compliance Attestation Form**. This form must be signed and submitted to an authorized person at the testing center in Farley Field House on the first day of testing.
- A negative test result is required twice during each week that the contractor is on campus. Once a negative test result is received, the vendor will be issued a green badge to wear during their visit to show they are authorized to work on campus. If applicable, the vendor may then proceed to the Comm Center (located in Rhodes Hall) to obtain keys or an access card. If the antigen test returns a positive result, the contractor will be directed to leave campus and the contractor’s employer will be notified of the positive test result.

All contractors and vendors must wear a surgical, KN95, or equivalent (N95, KF-94) mask inside.
Any contractor or vendor working on campus MUST NOT try to access any campus space without working through their Bowdoin College contact and MUST NOT use a Bowdoin access card or physical key to provide access to any buildings and spaces on the College campus to anyone else.

I certify that I have communicated with all of the individuals employed or controlled by my company, and I am reporting that each individual will comply with this policy.
