The purpose of this procedure is to provide information to employees and students of Bowdoin College regarding the safe response to a discharged fire extinguisher in campus buildings. Fire extinguishers must only be used to fight a fire, and only if the person doing so is trained and/or is comfortable doing so. Proper use of fire extinguishers is safe; however, employees and students should be aware of these procedures to prevent the risk of injury. The office of Environmental Health and Safety (EHS) provides periodic fire extinguisher training.

Intentional discharge of a fire extinguisher for reasons other than fighting a fire may result in disciplinary action, fines, and reimbursement to the College for clean-up costs.

Hazard Assessment. The following types of fire extinguishers are found at Bowdoin College, and are used for specific fire classes as outlined below.

**Class ABC Dry Chemical** multipurpose (paper, combustible liquids, and electrical fires) fire extinguishers contain ammonium phosphate, a caustic powder that can cause physical injury by contact or inhalation, and potentially damage sensitive materials such as electronics. These are the most commonly found fire extinguishers found throughout campus buildings. A copy of the Safety Data Sheet (SDS) is attached for reference.

**Class K Wet Chemical** fire extinguishers and hood suppression systems (kitchen grease and oil fires) contain potassium acetate and potassium citrate, a respiratory system, eye, and skin irritant that may cause coughing, sore throat, difficulty breathing, eye pain, and skin redness. A copy of the Safety Data Sheet (SDS) is attached for reference.

**Class ABC Clean Agent** fire extinguishers (sensitive IT equipment and chemical storage rooms) contain 1,1,1,2,3,3,3-heptafluoropropane, a liquefied, compressed gas pressurized with nitrogen that stops the spread of fire by chemically disrupting combustion. Clean agent fire extinguishers are highly effective in extinguishing fires without the production of residues that could damage valuable assets such as computer/server equipment. Heptafluoropropane is reported to have low toxicity to human health once dissipated.

Notifications. Notify the Security Communications Center immediately following the discharge of fire extinguishing agent. Upon notification of a discharge, the Communications Center will contact the following personnel:

- **In all cases:** Associate Director of Environmental Health and Safety
- **In all cases:** Senior Associate Director of Facilities Management and Operations
- **In all cases:** Work Order Controller
- **If in a student residence:** Director of Residential Life, or the Dean on-call if after hours
- **If in the science center:** Manager of the Bowdoin Science Center and Laboratory Safety
- **If in a server room:** Director of IT Services
- **If in a commercial kitchen:** Director of Dining Services

Response Actions. Following the discharge of a fire extinguisher:

- Leave the immediate area, close doors on the way out, and notify the Security Communications Center at 207-725-3500/x3500.
- If the distribution of the discharge is significant and particularly if it is airborne, personnel at the scene or the arriving Security Officer should pull the fire alarm, evacuate the building, and contact the Brunswick Fire Department.
- If the discharge is limited in extent and not significantly airborne, secure the immediate area to prevent further spread until professional cleaning has been completed.
• Persons who may have been impacted by the discharge shall be assessed for injuries, particularly to the eyes or respiratory system. EMS shall be contacted for persons that require medical attention.
• The College’s environmental contractor (Environmental Projects, Incorporated (EPI)) shall be contacted to initiate clean-up. Emergency clean up contact information is provided in the Distribution and Contact Information section below. *College personnel (i.e., housekeeping) are not trained or equipped to handle clean-up of discharged fire extinguisher chemical agents.*
• Personal affects, particularly electronics, may be collected for individual cleaning once the area of the discharge has been addressed. Damages should be reported to the College.

**Precautions.** No one shall enter areas where fire extinguishers have been discharged. If necessary, the appropriate PPE must be worn, including but not limited to nitrile gloves, safety glasses, and shoe covers. Efforts must be made to limit tracking fire extinguishing agents to locations outside of the discharged area. If the area must be traversed in an emergency, without PPE, best efforts should be made not to inhale or disturb the agents. PPE is available at the Bowdoin warehouse during standard business hours, or from the Safety Station in Rhodes Hall, adjacent to the Office of EHS, if after hours.

**Incident Follow-up Actions.**
• In instances involving a cooking fire the appliance will need to be inspected to determine if it is still safe for use. Work Order Controller will issue a work order to the Electric Shop to complete the inspection and report back to EHS whether replacement will occur or clean-up is necessary.
• EHS will coordinate clean-up if necessary and communicate to the affected parties when an impacted appliance is safe to use.
• Work Order Controller will issue a work order to the Mechanical Services Shop to replace discharged fire extinguisher.

SAFETY DATA SHEET

Section 1. PRODUCT AND COMPANY IDENTIFICATION

Product Name: ABC Dry Chemical Fire Extinguishant
Other Identifiers: Multi-purpose Dry Chemical
Product Code(s): CH550, F15, F18
Recommended Use: Fire suppression, not for human or animal drug use.
Manufacturer: AMEREX CORPORATION
Internet Address: www.amerex-fire.com
Address: 7595 Gadsden Highway, P.O. Box 81
Trussville, AL 35173-0081
Company Telephone: (205) 655-3271
E-mail Address: info@amerex-fire.com
Emergency Contacts: Chemtrec 1(800) 424-9300 or (703) 527–3887
Revised: May, 2016

**Emergency overview:**
Light yellow, fine solid powder, odorless.

**Adverse health effects and symptoms:**
Irritant to the respiratory system; Irritating to eyes and skin. Symptoms may include coughing, shortness of breath, and irritation of the lungs, eyes, and skin. Ingestion, although unlikely, may cause cramps, nausea and diarrhea.

**Section 4. FIRST AID MEASURES**

**Eye Exposure:** May cause irritation. Irrigate eyes with water and repeat until pain free. Seek medical attention if irritation develops, or if vision changes occur.

**Skin Exposure:** May cause skin irritation. In case of contact, wash with plenty of soap and water. Seek medical attention if irritation persists.

**Inhalation:** May cause irritation, along with coughing. If respiratory irritation or distress occurs, remove victim to fresh air. Seek medical attention if irritation persists.

**Ingestion:** Overdose symptoms may include numbness or tingling in hands or feet, uneven heart rate, paralysis, feeling faint, chest pain or heavy feeling, pain spreading to the arm or shoulder, nausea, diarrhea, sweating, general ill feeling, or seizure (convulsions). If victim is conscious and alert, give 2-3 glasses of water to drink. If conscious, do not induce vomiting. Seek immediate medical attention. Do not leave victim unattended. To prevent aspiration of swallowed product, lay victim on side with head lower than waist.

**Medical conditions possibly aggravated by exposure:** Inhalation of product may aggravate existing chronic respiratory problems such as asthma, emphysema, or bronchitis. Skin contact may aggravate existing skin disease. Chronic overexposure may cause pneumoconiosis ("dusty lung" disease).
Section 5. FIRE-FIGHTING MEASURES

Flammable Properties: Not flammable
Flash Point: Not determined
Suitable Extinguishing Media: Non-combustible. Use extinguishing media suitable for surrounding conditions.
Hazardous Combustion Products: Carbon and sulfur oxides

Explosion Data:
- Sensitivity to Mechanical Impact: Not sensitive
- Sensitivity to Static Discharge: Not sensitive
- Unusual fire/explosion hazards: In a fire this material may decompose, releasing oxides of carbon, sulfur, potassium and nitrogen (see Section 10).

Protective Equipment and Precautions for Firefighters: As in any fire, wear self-contained breathing apparatus in pressure-demand, NIOSH approved or equivalent and full protective gear.

Section 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions: Avoid contact with skin, eyes, and clothing.
Personal Protective Equipment: Minimum - safety glasses, gloves, and a dust respirator.
Emergency Procedures: NA
Methods for Containment: Prevent further leakage or spillage if safe to do so.
Methods for Clean Up: Avoid dust formation. Clean up released material using vacuum or wet sweep and shovel to minimize generation of dust. Bag and transfer to properly labeled containers. Ventilate area and wash spill site after material pickup is complete.
Environmental Precautions: Prevent material from entering waterways.
Other: If product is contaminated, use PPE and containment appropriate to the nature of the most toxic chemical/material in the mixture.
Section 7. HANDLING AND STORAGE

Personal Precautions: Use appropriate PPE when handling or maintaining equipment, and wash thoroughly after handling (see Section 8).

Conditions for Safe Storage/Handling: Keep product in original container or extinguisher. Contents may be under pressure – inspect extinguisher consistent with product labeling to ensure container integrity.

Incompatible Products: Do not mix with other extinguishing agents, particularly potassium bicarbonate and sodium bicarbonate. Incompatible with strong oxidizing agents and strong acids. Do not store in high humidity. Do not combine with chlorine compounds.

*German regulatory limits  **PNOC = Particulates not otherwise classified (ACGIH) also known as Particulates not otherwise regulated (OSHA)  *** NR = Not Regulated. All values are 8 hour time weighted average concentrations.
Engineering Controls:
- Showers
- Eyewash stations
- Ventilation systems

Personal Protective Equipment – PPE Code E:

The need for respiratory protection is not probable during short-term exposure. PPE use during production process must be independently evaluated.

Eye/face Protection:  Tightly fitting safety goggles
Skin and Body Protection:  Wear protective gloves/coveralls
Respiratory Protection:  If exposure limits are exceeded or irritation is experienced, NIOSH approved respiratory protection should be worn. Use P100 respirators for limited exposure, use air-purifying respirator (APR) with high efficiency particulate air (HEPA) filters for prolonged exposure. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current safety and health requirements. The need for respiratory protection is not likely for short-term use in well ventilated areas. Good personal hygiene practice is essential, such as avoiding food, tobacco products, or other hand-to-mouth contact when handling. Wash thoroughly after handling.

Hygiene Measures:

Section 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:  Light yellow powder, finely divided odorless solid
Molecular Weight:  NH₄H₂PO₄: 115.03; (NH₄)₂SO₄: 132.14
Odor: Odorless
Odor Threshold: No information available
Decomposition Temperature °C: 100 - 120
Freezing Point °C: No information available
Initial Boiling Point °C: No information available
Physical State: Crystalline Powder
pH: Mixture approximately 4 to 5; NH4H2PO4: 4.2 in 0.2 molar solution; (NH4)2SO4: 5.5 in 0.1 molar solution
Flash Point °C: None
Auto-ignition Temperature °C: None
Boiling Point/Range °C: Not Applicable
Melting Point/Range °C: NH4H2PO4: 190; (NH4)2SO4: 280
Flammability: Not Flammable
Flammability Limits in Air °C: Upper – Not Flammable; Lower-Not Flammable
Explosive Properties: None
Oxidizing Properties: None
Volatile Component (%vol): Not Applicable
Evaporation Rate: Not Applicable
Vapor Density: Not Applicable
Vapor Pressure: Not Applicable
Specific gravity at 25 °C: NH4H2PO4: 1.80; (NH4)2SO4: 1.77
Solubility: Coated-Not Immediately Soluble in Water
Partition Coefficient: NH4H2PO4 Est: -4.11; (NH4)2SO4: Est: -0.48
Viscosity: Not Applicable

NOTE: NH4H2PO4 – Monoammonium Phosphate; (NH4)2SO4: – Ammonium Sulfate

Section 10. STABILITY AND REACTIVITY

Stability: Stable under recommended storage and handling conditions.
Reactivity:
Incompatibles: Strong alkalis (bases), magnesium, strong oxidizers, isocyanuric acids and chlorine compounds.
Conditions to Avoid: Storage or handling near incompatibles.
Hazardous Decomposition Products: Heat of fire may release carbon monoxide, carbon dioxide, and sulfur dioxide. Also ammonia, oxides of phosphorous and nitrogen oxides may be released during decomposition.
Possibility of Hazardous Reactions: Slight
Hazardous Polymerization: Does not occur
Section 11. TOXICOLOGICAL INFORMATION

Likely Routes of Exposure: Inhalation, skin, and eye contact.

Symptoms:

Immediate:
  Inhalation: Irritation, coughing.
  Eyes: Irritation.
  Skin: Irritation.

Delayed: Symptoms appear to be relatively immediate

Acute Toxicity: Relatively non-toxic.

Chronic Toxicity:
  Short-term Exposure: None known.
  Long-term Exposure: As with all dusts, pneumoconiosis, or “dusty lung” disease, may result from chronic exposure.

Section 12. ECOLOGICAL INFORMATION

Ecotoxicity: Negative effects unknown. Provides nutrient nitrogen and phosphorus to plant life.
Persistence/Degradability: Degrades rapidly in humid/wet environment.
Probability of rapid biodegradation: NH4H2PO4 Est: 0.693 (Rapid); (NH4)2SO4: Est: 0.684 (Rapid)
Anaerobic biodegradation probability: NH4H2PO4 Est: 0.398 (Slow); (NH4)2SO4: Est: 0.398 (Slow)
Bioaccumulation potential: Low.
Bioconcentration factor: NH4H2PO4: 3.16 L/kg; (NH4)2SO4: 3.16 L/kg (wet weight)
Bioaccumulation: Extent unknown.
Mobility in soil: Slow evaporation rate; water soluble, may leach to groundwater
Log Koc: NH4H2PO4 Est: -1.25; (NH4)2SO4: Est: 1.35
Log Koa: NH4H2PO4 Est: 16.72; (NH4)2SO4: Est: 20.10
Log Kaw: NH4H2PO4 Est: -20.86; (NH4)2SO4: Est: -19.62

NOTE: NH4H2PO4 – Mono-ammonium Phosphate; (NH4)2SO4: – Ammonium Sulfate

Other Adverse Ecological Effects: No other known effects at this time

### Section 13. DISPOSAL CONSIDERATIONS

**Safe Handling**
- Use appropriate PPE when handling, and wash thoroughly after handling (see Section 8).

**Waste Disposal Considerations**
- Dispose in accordance with federal, state, and local regulations.

**Contaminated Packaging**
- Dispose in accordance with federal, state, and local regulations.

**NOTES:**
This product is not a RCRA characteristically hazardous or listed hazardous waste. Dispose of according to state or local laws, which may be more restrictive than federal laws or regulations. Used product may be altered or contaminated, creating different disposal considerations.

**NOTES:**
This product is not defined as a hazardous material under U.S. Department of Transportation (DOT) 49 CFR 172, or by Transport Canada “Transportation of Dangerous Goods” regulations.
Special Precautions for Shipping:
If shipped in a stored pressure-type fire extinguisher, and pressurized with a non-flammable, non-toxic inert expellant gas, the fire extinguisher is considered a hazardous material by the US Department of Transportation and Transport Canada. The proper shipping name shall be FIRE EXTINGUISHER and the UN designation is UN 1044. The DOT hazard class is 2.2, non-flammable, when shipped via highway or rail.

**European Risk and Safety phrases:**

EU Classification: XN Irritant

R Phrases: 20 Harmful by inhalation.
36/37 Irritating to eyes, respiratory system.

S Phrases: 22 Do not breathe dust.
24/25 Avoid contact with skin and eyes
26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
36 Wear suitable protective clothing.

**U.S. Federal Regulatory Information:**

**SARA 313:**
Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA) - This product does not contain and chemicals which are subject to the reporting requirements of the Act and Title 40 of the Code of Federal Regulations, Part 372.

None of the chemicals in this product are under SARA reporting requirements or have SARA threshold planning quantities (TPQs) or CERCLA reportable quantities (RQs), or are regulated under TSCA 8(d).

**SARA 311/312 Hazard Categories:**

- Acute Health Hazard: Yes
- Chronic Health Hazard: No
- Fire Hazard: No
- Sudden Release of Pressure Hazard-*: Yes
- Reactive Hazard: No

* - Only applicable if material is in a pressurized extinguisher.

**Clean Water/Clean Air Acts:**
This product does not contain any substances regulated as pollutants pursuant to the Clean Water Act (40 CFR 122.21 and 40 CFR 122.42) or Clean Air Act, Section 112 Hazardous Air Pollutants (HAPs) (see 40 CFR 61) and Section 112 of the Clean Air Act Amendments of 1990.
U.S. State Regulatory Information:

Chemicals in this product are covered under specific State regulations, as denoted below:

**Alaska** - Designated Toxic and Hazardous Substances: None
**California** – Permissible Exposure Limits for Chemical Contaminants: None
**Florida** – Substance List: Mica Dust
**Illinois** – Toxic Substance List: None
**Kansas** – Section 302/303 List: None
**Massachusetts** – Substance List: Mica Dust
**Minnesota** – List of Hazardous Substances: None
**Missouri** – Employer Information/Toxic Substance List: None
**New Jersey** – Right to Know Hazardous Substance List: None
**North Dakota** – List of Hazardous Chemicals, Reportable Quantities: None
**Pennsylvania** – Hazardous Substance List: None
**Rhode Island** – Hazardous Substance List: Mica Dust
**Texas** – Hazardous Substance List: No
**West Virginia** – Hazardous Substance List: None
**Wisconsin** – Toxic and Hazardous Substances: None

California Proposition 65: No component is listed on the California Proposition 65 list.

**Other:**
- Mexico – Grade: No component listed
- Canada – WHMIS Hazard Class: No component listed

Section 16. OTHER INFORMATION

This SDS conforms to requirements under U.S., U.K., Canadian, Australian, and EU regulations or standards, and conforms to the proposed 2003 ANSI Z400.1 format.

- Issuing Date: 17-June-2012
- Revision Date: 4-May-2016
- Revision Notes: None

The information herein is given in good faith but no warranty, expressed or implied, is made. Updated by William F. Garvin, CIH.
SAFETY DATA SHEET

Section 1. PRODUCT AND COMPANY IDENTIFICATION

Product Name: CH 530/660 KP Wet Agent
Other Identifiers: Class K liquid agent for extinguishers
Product Code(s): CH530/CH660
Model Code(s) for Fire Extinguishers: 260, 262
Recommended Uses: Class K Extinguisher
Manufacturer: AMEREX CORPORATION
Internet Address: www.amerex-fire.com
Address: 7595 Gadsden Highway, P.O. Box 81
Trussville, AL 35173-0081
Company Telephone: (205) 655-3271
E-mail Address: info@amerex-fire.com
Emergency Contacts: Chemtrec 1(800) 424-9300 or

Emergency overview: Clear to opaque liquid solution.
Adverse health effects and symptoms: This product is an irritant to the respiratory system, eyes, and skin. Symptoms may include coughing, sore throat, difficulty breathing, eye pain, and skin redness and irritation. Ingestion, although unlikely, may cause cramps, nausea and diarrhea.

Section 4. FIRST AID MEASURES

Eye Exposure: May cause irritation. Irrigate eyes with water and repeat until pain free. Seek medical attention if irritation persists.
Skin Exposure: May cause skin irritation. In case of contact, wash with plenty of soap and water. Seek medical attention if irritation persists.

Inhalation: May cause irritation, along with coughing. May cause dizziness or drowsiness. If respiratory irritation or distress occurs, remove victim to fresh air. Seek medical attention if irritation persists.

Ingestion: Overdose symptoms may include gastrointestinal complaints or change in urine output. If victim is conscious and alert, rinse out mouth and give 1-2 glasses of water or milk to drink. Do not induce vomiting. Consult medical service if feel unwell. Do not leave victim unattended. To prevent aspiration of swallowed product, lay victim on side with head lower than waist.

Medical conditions possibly aggravated by exposure: Inhalation of product may aggravate existing chronic respiratory problems such as asthma, emphysema, or bronchitis. Skin contact may aggravate existing skin disease.

Section 5. FIRE-FIGHTING MEASURES

Flammable Properties: Not flammable
Flash Point: Not determined
Suitable Extinguishing Media: Non-combustible. Use extinguishing media suitable for surrounding conditions.
Hazardous Combustion Products: Carbon, acetic acid fumes, and sulfur oxides
Explosion Data: Not sensitive
Sensitivity to Mechanical Impact: Not sensitive
Sensitivity to Static Discharge: In a fire this material may decompose, releasing oxides of carbon and potassium. (see Section 10).
Unusual fire/explosion hazards: As in any fire, wear self-contained breathing apparatus pressure-demand. NIOSH (approved or equivalent) and full protective gear.
Section 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions: Avoid contact with skin, eyes, and clothing.

Personal Protective Equipment: During minor spill clean-up: Minimum – chemical goggles, nitrile gloves, and an air purifying respirator.

Emergency Procedures: Large spills (one container or more) should be addressed by hazardous materials technicians who follow a specific emergency response plan and who are trained in the appropriate use of PPE.

Methods for Containment: Prevent further leakage or spillage if safe to do so. Use sorbent socks for containment.

Methods for Clean Up: Clean up released material using sorbent materials. Bag and drum for disposal; properly label containers; dispose as required by local, state, and federal regulations. Decontaminate with detergent and water.

Environmental Precautions: Prevent material from entering waterways.

Other: If product is contaminated, use PPE and containment appropriate to the nature of the most toxic chemical/material in the mixture.

Section 7. HANDLING AND STORAGE

Personal Precautions: Use appropriate PPE when handling or maintaining equipment, and wash thoroughly after handling (see Section 8).

Conditions for Safe Storage/Handling: Keep product in original container or extinguisher in a cool area. Use in well ventilated area. Prevent falling. Do not allow near heat sources. Contents may be under pressure – inspect extinguisher consistent with product labeling to ensure container integrity.

Incompatible Products: Do not mix with other extinguishing agents, strong acids, strong oxidants.

Hazardous Decomposition Products: Carbon dioxide, phosphorous oxide, acetic acid.

Hazardous Polymerization: Will not occur

*German regulatory limits  **PNOC = Particulates not otherwise classified (ACGIH) also known as Particulates not otherwise regulated (OSHA)  *** NR = Not Regulated. All values are 8 hour time weighted average concentrations.
Engineering Controls:

Showers
Eyewash stations
Ventilation systems

Personal Protective Equipment – PPE Code E:

The need for respiratory protection is not probable during short-term exposure. PPE use during production process must be independently evaluated.

Eye/Face Protection:

Tightly fitting safety goggles

Skin and Body Protection:

Wear nitrile or similar gloves, and coveralls or long sleeve shirt.

Respiratory Protection:

If exposure limits are exceeded or irritation is experienced, NIOSH approved respiratory protection should be worn. Use N100 respirators for limited exposure, use air-purifying respirator (APR) with high efficiency particulate air (HEPA) filters for prolonged exposure. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current safety and health requirements. The need for respiratory protection is not likely for short-term use in well ventilated areas. Good personal hygiene practice is essential, such as avoiding food, tobacco products, or other hand-to-mouth contact when handling. Wash thoroughly after handling.

Eye/Face Protection:

Tightly fitting safety goggles

Skin and Body Protection:

Wear nitrile or similar gloves, and coveralls or long sleeve shirt.

Section 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Clear to opaque liquid, water based
Molecular Weight: C2H3KO2: 98.14; C6H5O7K3: 306.39
Odor: Odorless
Odor Threshold: No information available
Decomposition Temperature °C: 100 - 120
Freezing Point °C: No information available
Initial Boiling Point °C: Approximately 149
Physical State: Liquid  
PpH: Approximately 8.5  
Flash Point °C: None  
Auto-ignition Temperature °C: None  
Boiling Point/Range °C: 149/141-155  
Melting Point/Range °C: C2H3KO2: 292; K3C6H5O7: 180  
Flammability: Not flammable  
Flammability/Explosive Limits in Air °C: Upper – No; Lower - No  
Explosive Properties: None  
Oxidizing Properties: None  
Volatile Component (%vol) Not Applicable  
Evaporation Rate: No information available  
Vapor Density: No information available  
Vapor Pressure: No information available  
Specific gravity: Approximately 1.2 at 25 °C  
Solubility: Soluble in water  
Partition Coefficient: No Information Available  
Viscosity: Not Applicable  

Note: C2H3KO2 – Potassium Acetate; C6H5O7K3 – Potassium Citrate

---

### Section 10. STABILITY AND REACTIVITY

**Stability:** Stable under recommended storage and handling conditions.  
**Reactivity:** Not reactive  
**Possibility of Hazardous Reactions:** Under normal conditions of storage and handling, hazardous reactions will not occur.  
**Incompatibles:** Strong acids and oxidizers, lime, inorganic bases. Avoid contact with aluminum, lead, tin, zinc, or other alkali sensitive metals or alloys  
**Conditions to Avoid:** Storage or handling near incompatibles.  
**Hazardous Decomposition Products:** Heat of fire may release carbon dioxide, phosphorous oxide, and acetic acid.  
**Possibility of Hazardous Reactions:** None  
**Hazardous Polymerization** Does not occur

---

### Section 11. TOXICOLOGICAL INFORMATION

**Likely Routes of Exposure:** Inhalation, skin, and eye contact.  
**Symptoms:**
Immediate
Inhalation: Irritation, coughing.
Eyes: Mild irritation.
Skin: Mild irritation.
Delayed: Symptoms appear to be relatively immediate
Acute Toxicity: Relatively non-toxic.
Chronic Toxicity:
Short-term Exposure: None known.
Long-term Exposure: None known

### Acute Toxicity Values - Health

### Section 12. ECOLOGICAL INFORMATION

Ecotoxicity: A weak environmental toxin. Specific negative impacts are unknown.

Probability of rapid biodegradation:
C2H3KO2 Est: 0.792 (Rapid); C6H5O7K3: 0.690 (Rapid)

Anaerobic biodegradation probability:
C2H3KO2 Est: 0.943 (Rapid); C6H5O7K3: 1.1142 (Rapid)

Bioaccumulation potential: Low.

Bioconcentration factor:
C2H3KO2 Est: 3.16 L/kg (wet weight) (Low BCF)
C6H5O7K3 Est: 3.16 L/kg (wet weight) (Low BCF)
Bioaccumulation factor: \( \text{C}_2\text{H}_3\text{KO}_2 \) Est: 0.929; \( \text{C}_6\text{H}_5\text{O}_7\text{K}_3 \) Est: 0.893

Mobility in soil: Slow evaporation rate; water soluble, may leach to groundwater

Log Koc (Kow Method): C2H3KO2 Est: -1.902; C6H5O7K3 Est: -0.411
Log Koa: Not available
Log Kow: C2H3KO2 Est: -3.72; C6H5O7K3 Est -0.28

NOTE: C2H3KO2 – Potassium Acetate; C6H5O7K3 – Potassium Citrate

Other Adverse Ecological Effects: No other known effects at this time

Section 13. DISPOSAL CONSIDERATIONS

Safe Handling Use appropriate PPE when handling, and wash thoroughly after handling (see Section 8).

Waste Disposal Considerations Dispose in accordance with federal, state, and local regulations.

Contaminated Packaging Dispose in accordance with federal, state, and local regulations.

NOTES: This product is not a RCRA characteristically hazardous or listed hazardous waste. Dispose of according to state or local laws, which may be more restrictive than federal laws or regulations. Used product may be altered or contaminated, creating different disposal considerations.

Section 14. TRANSPORT INFORMATION

UN Number: NA
UN Proper Shipping Name: NA
Transport Hazard Class: NA
Packing Group: NA
Marine Pollutant?: NO

IATA Not regulated
DOT Not regulated

NOTES:
This product is not defined as a hazardous material under U.S. Department of Transportation (DOT) 49 CFR 172, or by Transport Canada “Transportation of Dangerous Goods” regulations. This transportation information covers the CH 530-660 Wet Agent fire extinguisher agent as shipped in bulk containers and not when contained in fire extinguishers or fire extinguisher systems.

Special Precautions for Shipping:
If shipped in a stored pressure-type fire extinguisher, and pressurized with a non-flammable, non-toxic inert expellant gas, the fire extinguisher is considered a hazardous material by the US Department of Transportation and Transport Canada. The proper shipping name shall be FIRE EXTINGUISHER and the UN designation is UN 1044. The DOT hazard class/division is LIMITED QUANTITY when pressurized to less than 241 psig and when shipped via highway or rail. UN Class 2.2. Non-Flammable Gas, when shipping via air. Packing Group – N/A

* - Only applicable if material is in a pressurized extinguisher.

**Clean Water/ Clean Air Act:**
This product does not contain any substances regulated as pollutants pursuant to the Clean Water Act (40 CFR 122.21 and 40 CFR 122.42) or Clean Air Act, Section 112 Hazardous Air Pollutants (HAPs) (see 40 CFR 61) and Section 112 of the Clean Air Act Amendments of 1990.

**U.S. State Regulatory Information:**
Chemicals in this product are covered under specific State regulations, as denoted below:
Alaska - Designated Toxic and Hazardous Substances: None
California – Permissible Exposure Limits for Chemical Contaminants: None
Florida – Substance List: None
Illinois – Toxic Substance List: None
Kansas – Section 302/303 List: None
Massachusetts – Substance List: None
Minnesota – List of Hazardous Substances: None
Missouri – Employer Information/Toxic Substance List: None
New Jersey – Right to Know Hazardous Substance List: None
North Dakota – List of Hazardous Chemicals, Reportable Quantities: None
Pennsylvania – Hazardous Substance List: None
Rhode Island – Hazardous Substance List: None
Texas – Hazardous Substance List: None
West Virginia – Hazardous Substance List: None
Wisconsin – Toxic and Hazardous Substances: None
California Proposition 65: No component is listed on the California Proposition 65 list.

Other:
Mexico – Grade No component listed
Canada – WHMIS Hazard Class No component listed

Section 16. OTHER INFORMATION

This SDS conforms to requirements under U.S., U.K., Canadian, Australian, and EU regulations or standards, and conforms to the proposed 2003 ANSI Z400.1 format. No modifications of this SDS are authorized by AMEREX Corporation. Questions or comments should be directed to AMEREX Corporation (See Section 1).

Issuing Date 17-June-2012
Revision Date 7-March-2019; Revision D
Revision Notes None

The information herein is given in good faith but no warranty, expressed or implied, is made. Updated by William F. Garvin, CIH.
1. IDENTIFICATION OF THE SUBSTANCE/PREPARATIONS AND OF THE COMPANY UNDERTAKING

2. HAZARDS IDENTIFICATION

| EU Main Hazards               | Non Flammable Gas                                         |
| Routes of Entry              | Eye contact - Inhalation - Skin contact                   |
| Carcinogenic Status          | Not considered carcinogenic by NTP, IARC, and OSHA.       |
| Target Organs                | Respiratory System - Skin - Eye - Cardiovascular System - Central Nervous System |
| Health Effects - Eyes        | Direct contact with the cold gas or liquid can cause freezing of exposed tissues, with pain, redness, burns and corneal damage. |
| Health Effects - Skin        | Direct contact with the cold gas or liquid can cause freezing of exposed tissues. |
| Health Effects - Ingestion   | Ingestion is not a possible route of exposure.            |
| Health Effects - Inhalation  | Exposure to vapor at high concentrations have the following effects: - light headedness - dizziness - difficulty with breathing - drowsiness - nausea - mental confusion - increased blood pressure – increased respiratory rate - heart irregularities - loss of consciousness - suffocation if air is displaced by vapors. Individuals with preexisting diseases of the cardiovascular system or nervous system may have increased susceptibility from excessive exposures. |

4. FIRST AID MEASURES

Eyes
Immediately flood the eye with plenty of warm water for at least 15 minutes, holding the eye open. Obtain medical attention if soreness or redness persists.

Skin
Flush with water. Obtain medical attention if frostbite or blistering occurs or redness persists.

Ingestion
Ingestion is not considered a potential route of exposure.

Inhalation
Remove from exposure. If there is difficulty in breathing, give oxygen. Obtain medical attention immediately.

Advice to Physicians
In case of frostbite, place the frostbitten part in warm water. If warm water is not available or impractical to use, wrap the affected parts gently in blankets. DO NOT USE HOT WATER.
The use of epinephrine or similar compounds can increase susceptibility to heart irregularities caused by excessive exposure to these types of compounds.

5. FIRE - FIGHTING MEASURES

Extinguishing Media
FM-200 is used as an extinguishing agent and therefore is not a problem when trying to control a blaze. Use extinguishing agent appropriate to other materials involved. Keep containers and surroundings cool with water spray as containers may rupture or burst in the heat of a fire.

Unusual Fire and Explosion Hazards
Containers may explode in heat of fire.

Protective Equipment for Fire-Fighting
Wear full protective clothing and self-contained breathing apparatus as appropriate for specific fire conditions.

6. ACCIDENTAL RELEASE MEASURES

Wear full protective clothing and self-contained breathing apparatus. Remove leaking cylinder to a safe place. Ventilate the area. Leaks inside confined spaces may cause suffocation as vapors may displace air, and should not be entered without a self-contained breathing apparatus.

7. HANDLING AND STORAGE

Containers should be properly stored and secured to prevent falling or being knocked over. Do not drag, slide or roll containers. Do not drop containers or permit them to strike against each other. Never apply flame or localized heat directly to any part of the containers. Store away from sources of heat or ignition. Storage area should be: cool - dry - well ventilated - under cover - out of direct sunlight
8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational Exposure Standards
Occupational exposure limits are listed below, if they exist.

1,1,1,2,3,3,3-Heptafluoropropane
None established.

Engineering Control Measures
Use with adequate ventilation. There should be local procedures for the selection, training, inspection and maintenance of this equipment. When used in large volumes or odor becomes apparent, use local exhaust ventilation.

Respiratory Protection
Not normally required under conditions of use as a portable fire extinguisher. For other applications creating oxygen deficient atmospheres, use a self contained breathing apparatus, as an air purifying respirator will not provide protection.

Hand Protection
Wear rubber gloves. Avoid contact with skin.

Eye Protection
Chemical goggles or safety glasses with side shields. Avoid contact with eyes.

Body Protection
Normal work wear.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State Liquefied gas under pressure
Color Colorless
Odor Odorless
Specific Gravity 1.46
Boiling Range/Point (°C/F) -16.4°C/3°F
Flash Point (PMCC) (°C/F) Not Flammable
Solubility in Water 260 mg/L
Vapor Density (Air = 1) 6.04
Vapor Pressure 58.8 psia @ 70°F
Gas Density 2.01 lb/ft³ @ 70°F
Evaporation Rate Not applicable

10. STABILITY AND REACTIVITY

Stability
 Stable under normal conditions.

Conditions to Avoid
- Heat - High temperatures - Exposure to direct sunlight

Materials to Avoid
- powdered metals (ex. aluminum, zinc, etc.) - strong oxidizing agents – strong reducing agents – strong alkalis

Hazardous Polymerization
Will not occur.
10. STABILITY AND REACTIVITY

Hazardous Decomposition Products
- oxides of carbon - hydrogen fluoride

11. TOXICOLOGICAL INFORMATION

Acute Toxicity
4 hour LC50(rat) >788,698 ppm

Chronic Toxicity/Carcinogenicity
This product is not expected to cause long term adverse health effects.

Genotoxicity
This product is not expected to cause any mutagenic effects. Tests have shown that this material does not cause genetic damage in bacterial or mammalian cell cultures.

Reproductive/Developmental Toxicity
This product is not expected to cause adverse reproductive effects.

12. ECOLOGICAL INFORMATION

Mobility
No data available.

Persistence/Degradability
No data available.

Bio-accumulation
No data available.

Ecotoxicity
No data available.

13. DISPOSAL CONSIDERATIONS

Dispose of container in accordance with all applicable local and national regulations. Do not cut, puncture or weld on or near to the container. If spilled, contents will vaporize to the atmosphere.

14. TRANSPORT INFORMATION

DOT CFR 172.101 Data Heptafluoropropane, 2.2, UN3296
UN Proper Shipping Name Heptafluoropropane
UN Class (2.2) Non-Flammable Gas
UN Number UN3296
UN Packaging Group Not applicable

15. REGULATORY INFORMATION

EU Label Information
Classification and labelling have been performed according to EU directives 67/548/EEC and 99/45/EC including amendments(2001/60/EC and 2006/8/EC)
EU Hazard Symbol and Indication of Danger.
Non Flammable Gas
15. REGULATORY INFORMATION

R phrases
None

S phrases
None

US REGULATIONS (Federal, State) and INTERNATIONAL CHEMICAL REGISTRATION LAWS

TSCA Listing
This product contains ingredients that are listed on or exempt from listing on the EPA Toxic Substance
Control Act Chemical Substance Inventory.

EINECS Listing
All ingredients in this product are listed on the European Inventory of Existing Commercial Chemical
Substances (EINECS) or the European List of New Chemical Substances (ELINCS) or are exempt from
listing.

DSL/NDSL (Canadian) Listing
All ingredients in this product are listed on the Domestic Substance List (DSL) or the Non-Domestic
Substance List (NDSL) or are exempt from listing.

WHMIS Classification
A
This product was classified in accordance with the hazard criteria of the Canadian Controlled Products
Regulations and the MSDS contains all the information required by these regulations.

MA Right To Know Law
All components have been checked for inclusion on the Massachusetts Substance List (MSL). Those
components present at or above the de minimis concentration include: - none

PA Right To Know Law
This product contains the following chemicals found on the Pennsylvania Hazardous Substance List: -
none

NJ Right To Know Law
This product contains the following chemicals found on the NJ Right To Know Hazardous Substance
List: - none

California Proposition 65
This product does not contain materials which the State of California has found to cause cancer, birth
defects or other reproductive harm.

SARA Title III Sect. 302 (EHS)
This product does not contain any chemicals subject to SARA Title III Section 302.

SARA Title III Sect. 304
This product does not contain any chemicals subject to SARA Title III Section 304.

SARA Title III Sect. 311/312 Categorization
- Immediate (Acute) Health Hazard - Pressure Hazard

SARA Title III Sect. 313
This product does not contain a chemical which is listed in Section 313 at or above de minimis
concentrations.
16. OTHER INFORMATION

NFPA Ratings
NFPA Code for Health - 1
NFPA Code for Flammability - 0
NFPA Code for Reactivity - 0
NFPA Code for Special Hazards – None

HMIS Ratings
HMIS Code for Health - 1
HMIS Code for Flammability - 0
HMIS Code for Reactivity - 0
HMIS Code for Personal Protection - See Section 8
